

ShuleHub Parents menu

Headmaster guide · How to run guardians and student links

Sign in as Headmaster → left menu → **Parents**

Add parent · Link student · Message · Keep login safe

Who this is for

This page is the guardian directory. As Headmaster you can add parents, link them to students, send a message, and help them sign in. School admin and Academic master can do the same.

A parent login is not useful until they are linked to a student. You can also create a parent during **Students** → **Admit student** → **Create parent now**. Use this Parents page when the guardian already exists, or when you need to link, message, or fix a login.

Open the page

- 1 Sign in with your Headmaster email or phone.
- 2 If you have more than one school, pick the school first (Schools → Open school).
- 3 Click **Parents** in the left menu. Title: "Parents". Subtitle: "Guardians and links".

What you see

Part of the screen	What it is for
Show archived	Tick to see deactivated parents so you can restore them.
Link student	Opens a small form on the list to attach an existing parent to a student who has no parent yet.
Add parent	Gold button with a plus. Opens the Add parent form. The parent list is hidden while the form is open.
Table	Name, email, linked students, phone, status.
Sort	Click Name, Email, or Status to sort the list.
Row buttons	Edit (pen), message, unlock, reset 2FA, reset password, deactivate, restore.

Status chips: Active or Archived, plus extras **Locked** (five failed logins) and **2FA** (authenticator enrolled).

Add a parent

- 1 Click the gold **Add parent** button. The form opens over the page. The parent list is not shown.
- 2 Enter **Name** and **Email**.

3 Enter a phone number (Tanzania format). If you leave password blank, ShuleHub creates a temporary password and tries to SMS it to that phone.

4 Optional: occupation and address.

5 Click **Save parent** and confirm. The form closes. They appear in the list and on Users with role Parent.

Save stays disabled until there is a phone, or a password that meets the strength bar. Close, Cancel, Escape, or a click outside closes the form without saving. Email cannot be changed after save. Adding a parent does not link a student — do that next, or use Create parent now on Admit student.

Edit a parent

1. Click the pen icon on the row. The same form opens. The parent list is hidden.
2. Linked student names show under the title, or “No students linked”.
3. Change name, phone, occupation, or address. Click **Save changes** and confirm.

Email stays locked. Cancel or Close returns you to the list.

Link a parent to a student

Use this when the parent already exists and the student has no parent yet.

1 Either click **Link student** at the top, or on a row click **Link / Add student**.

2 Choose the student (only students with no parent appear), the parent, and the relationship: Father, Mother, Guardian, or Other.

3 Click **Link** and confirm.

To remove a link, click **Unlink** on that student under the parent and confirm. The parent account is not deleted. The student can then be linked again.

If the student list says “Every live student already has a parent,” link from the Students page instead, or unlink first. A new guardian at admission is faster with Students → Admit student → Create parent now.

Message a parent

1. Click the message icon on the row.
2. Messages opens on their linked student’s thread.
3. Click **Write comment**, type the note, optionally tick SMS, then **Post comment**.

If they have no student linked, you will see “Link a student first.” SMS is only an alert that a comment exists — they read and reply in the app.

Keep a parent login safe

Unlock

Shows when the row has a Locked chip (five failed logins). Confirm Unlock so they can sign in again at once.

Reset password

Creates a temporary password. If they have a phone, ShuleHub sends it by SMS. Confirm before you click.

Reset 2FA

Shows only if they enrolled Google Authenticator. After reset they set up 2FA again at next sign-in.

Deactivate

Archives the parent. They leave the normal list. Data stays. Confirm says Deactivate, not Delete.

Tick **Show archived** to find them. Click **Restore**. They return to the live list at once — you do not refresh. You can also Unlock, Reset password, and Reset 2FA on the Users page.

Typical day

Job	Clicks
New guardian with a new student	Students → Admit student → Create parent now → Save student
Guardian already in the school	Parents → Link student → choose student and parent → Link
Guardian first, student later	Parents → Add parent → later Link
Wrong phone	Pen → change phone → Save changes
Note to a family	Message icon → Write comment → Post comment
Forgot password	Reset password on the row
Cannot sign in (locked)	Unlock
Left the school	Deactivate. Show archived → Restore if they return

If something fails

What you see	What to do
Cannot save a new parent	Need name, email, and a phone or a password that meets the strength bar.
Email is already registered	That email is in use. Use another email, or Link the existing parent.
Student list empty when linking	Every live student already has a parent, or no students yet. Admit or unlink first.
“Link a student first” on Messages	Link this parent to a student, then click Message again.
“No SMS was sent”	Parent still saved or password still reset. Check the phone, or tell them the password in person. SMS needs the school's text service to be turned on.
Add parent missing	Only Headmaster, School admin, and Academic master see this page's tools.
