Headmaster guide · How to set up the school year, classes, rooms, teachers, and grading
Sign in as Headmaster → left menu → Academics

Years · Terms · Classes · Subjects · Rooms · Allocations · Result weights · Grading bands

Who this is for

Academics is the school's structure. Students, exams, the timetable, attendance, and report cards all hang off what you set here. Headmaster, School admin, and Academic master can open the page. Some buttons are limited — see **Who can do what**.

Academics is **not** the teacher staff list, the student list, the exam mark book, or the weekly timetable. Those are separate menus. This page only builds the skeleton those menus use.

Contents

- 1. How the pieces fit together
- 2. Open the page and read the screen
- 3. Who can do what
- 4. Set up in this order
- 5. Years & terms

- 9. Teachers tab (who teaches what)
- 10. Results (how marks combine)
- 11. Grading (letters and mark ranges)
- 12. What other menus use this
- 13. Typical day
- 14. If something fails

How the pieces fit together

Organization → School year → Terms → Class → Section → Student

Subject → Curriculum topic (optional) → Allocation (who teaches it) → Timetable / Exam / Grade

Building → Room → Timetable slot

Result weights + Grading bands → Term result → Report card

Piece	What it is	Lives on
Organization terms count	2 or 4 terms for every new year in that organization	Platform admin → Configurations
Academic year	One school year (for example 2026/2027). One year is marked Current.	Academics → Years & terms
Term	A slice of that year (Term 1, Term 2...). Created automatically when you add a year.	Academics → Years & terms

Piece	What it is	Lives on
Class	A named group in that year (Form 1, Form 2). Code must be unique in that year.	Academics → Classes
Section	A stream inside the class (A, B). Students are admitted into a section.	Academics → Classes
Subject	A taught course (Mathematics). Code must be unique at the school.	Academics → Subjects
Curriculum topic	Optional syllabus heading under a subject, optionally limited to one class.	Academics → Subjects
Building	A named block (Block A). Used only as the room dropdown.	Academics → Rooms
Classroom / room	A place on the timetable (Lab 1). Pick a building.	Academics → Rooms
Allocation	This teacher teaches this subject to this class (optional section) in this year.	Academics → Teachers
Result weights	How midterm, semi, and terminal marks combine for this school and year.	Academics → Results
Grading bands	Letter and point ranges for this school only (A 80–100, and so on).	Academics → Grading

Classes belong to a year. Subjects belong to the school (they are reused every year). Allocations belong to a year. Grading bands belong to the school, not to a year. Result weights belong to a year, and can be narrowed to one term or one subject.

Open the page and read the screen

1 Sign in with your Headmaster email or phone.

2 If you have more than one school, pick the school first (Schools → Open school). Everything on Academics is for that school only.

3 Click **Academics** in the left menu.

Part of the screen	What it is for
Set up in this order	Gold chips at the top: Year → Term → Class → Section → Subject → Allocate teacher.
Counts	Years, Classes, Subjects, Allocations. Quick check that the skeleton is filling in.
Tabs	Years & terms · Classes · Subjects · Rooms · Teachers · Results · Grading.
Search	Filters the list on the tab you are on. Hidden on Results (that tab is a form, not a list).
Gold Add button	Opens a form over the page. Confirm before save. Close, Cancel, Escape, or a click outside closes without saving.
Pen icon	Edit that row.
Trash icon	Delete. Always asks you to confirm. ShuleHub may still refuse if other data is attached.

Click a year on Years & terms to select it (highlighted). Terms under it belong to that year. New terms default to the selected year.

Who can do what

Action	Headmaster	School admin	Academic master
Open Academics	Yes	Yes	Yes
Years, terms, classes, sections, subjects, topics, rooms, allocations	Yes	Yes	Yes
Buildings (add / edit / delete)	Yes	Yes	View only — ask Headmaster or School admin to add one
Result weights (Results tab)	Yes	No	Yes
Grading bands (Grading tab)	Yes	View only	Yes

Teachers, parents, and students do not see this menu. Platform admin does not set classes here — they set how many terms a new year gets, on Configurations.

Set up in this order

- 1 Confirm terms-per-year with platform admin (2 or 4). This is per organization, on Configurations.
- 2 Add the academic year. Terms are created automatically.
- 3 Adjust term dates if the split is wrong.
- 4 Add classes for that year (Form 1, Form 2...).
- 5 Add sections (A, B) so students can be admitted.
- 6 Add subjects (Mathematics, English...).
- 7 Add teachers on the **Teachers** menu (staff directory), then come back here.
- 8 Allocate who teaches what (Academics → Teachers tab).
- 9 Add buildings, then rooms, if you will use the timetable.
- 10 Save grading bands for this school. Optionally save result weights for the year.

You can admit students after you have a year, a class, and a section. You can create exams after you have a year, class, and subjects. You can build a timetable after allocations and rooms exist.

Years & terms

Academic years

A year is the container for classes, exams, fees, allocations, and enrolments. Exactly one year should be Current. Admit, exams, and promotion use the current year by default.

- 1 Tab **Years & terms**. Click **Add year**.
- 2 Enter a name (2026/2027), start date, and end date. End must be after start.
- 3 Save and confirm. Terms appear automatically: Term 1 ... Term N, dates split evenly across the year.

N is 2 or 4, from the organization's setting on platform Configurations. Changing that setting later does **not** rewrite years you already created. It only affects new years.

If the new year is saved as current (the usual case), Term 1 is marked Current. Other years lose the Current chip.

- **Make current** — shown on years that are not current. Confirm first. Only one current year at a time.
- **Pen** — change name or dates. Does not recreate terms.
- **Trash** — delete the year only after you have cleared what hangs on it (see failures table).
- Click the year row to select it. The Terms card then shows that year's terms.

Terms

Terms belong to the selected year. You normally only edit dates, or add an extra term if you must.

- **Add term** — year (defaults to the selected year), name, start, end. End must be after start. Name cannot repeat in that year.
- **Pen** — rename or move dates.
- **Trash** — refused if exams or result weights still use the term.
- **Current** marks the active term for that year.

Classes and sections

A class is “Form 3 in 2026/2027”. A section is “Form 3 A”. Students sit in a section. You can have a class with no section, but admit and the timetable work better once A or B exists.

Add a class

- 1 Tab **Classes**. Click **Add class**.
- 2 Pick the year (defaults to the current year). Enter name (Form 3) and code (F3).
- 3 Save and confirm. The code cannot repeat in that same year.

There is no edit-class form on this screen. To correct a class, delete it (if it is unused) and add it again, or leave it and add a new one.

Add a section

- 1 On the class row, click **Add section**.
- 2 Class is already chosen. Enter name (A) and optional capacity (seats).
- 3 Save. The same section name cannot repeat in that class.

- Trash on the class — refused if students, remaining sections, exams, or fee structures still use it. Allocations and notices for that class are cleared automatically.
- Trash on the section — refused if students are still in it. Allocations, timetable slots, and attendance rows for that section are cleared.

Subjects and curriculum topics

Subjects

Subjects are school-wide. You do not recreate Mathematics every year. They appear on allocations, the timetable, exams, and grades.

- 1 Tab **Subjects**. Click **Add subject**.
- 2 Enter name (Mathematics) and code (MATH). Code must be unique at this school.
- 3 Save. Use the pen later to rename. Trash is refused if exam papers or grades still use the subject. Allocations and timetable slots for it are removed with the subject.

Curriculum topics

Optional syllabus headings (Quadratic equations) under a subject. You can limit a topic to one class, or leave class as Any class. Objectives show on the card.

- 1 On the same tab, click **Add topic**.
- 2 Pick subject, optional class, title, and optional objectives.
- 3 Save. Pen to edit. Trash to delete. Topics do not block deleting a subject on their own.

Curriculum topics are for planning. Official term results and report cards use exams and grading bands, not topics.

Rooms (buildings and classrooms)

Buildings

A building is a name in a dropdown (Block A, Science block). Headmaster and School admin create them. Academic master can see the list and pick a building when adding a room, but cannot add the building.

- **Add building** — name (required), notes (optional). Name must be unique at the school.
- Pen — rename. Rooms that pointed at the old name follow the new name.
- Trash — refused until every room in that building is removed.

Classrooms (rooms)

A room is what the timetable uses (Lab 1, Hall).

- 1 Click **Add room**.
- 2 Enter name. Optional: code, capacity, building (from the list above), notes.
- 3 Save. Name and code (if you set one) must be unique at the school.

Pen to edit. Trash is refused if the room is still on the timetable.

Teachers tab (who teaches what)

This tab is **not** the staff directory. Add people on the **Teachers** menu first. Here you only say who teaches which subject to which class this year.

1 Tab **Teachers**. Click **Allocate teacher**.

2 Pick teacher, subject, class, year (defaults to current). Section is optional — leave “Whole class” if they teach every stream.

3 Save. The same teacher + subject + class + section + year cannot be saved twice.

Pen to change the link. Trash removes only the allocation, not the teacher account. You need allocations before you build a useful timetable.

Results (how marks combine)

Official term results come from exams, not from assignments. Assignments are continuous assessment only. This tab sets the weights ShuleHub uses when it combines exam components.

Default math (Appendix A):

- Semi-terminal result = midterm $\times$ 10% + semi exam $\times$ 90%.
- Term result = that semi-terminal result $\times$ 50% + terminal exam $\times$ 50%.

Those two pairs must each add to 100. You can save a rule for:

- The whole year (term = All terms, subject = All subjects), or
- One term, or
- One subject, or
- One term and one subject.

The most specific saved rule wins. If nothing is saved, the 10/90 then 50/50 default is used.

Headmaster and Academic master can save. School admin should not use this tab to write weights.

Saved rules appear as a short list under the form (subject name or “All subjects”, then the four numbers).

Grading (letters and mark ranges)

Grading bands belong to **this school only**. They are not shared across the organization. Report cards and grades look up the letter from the student's percentage using this list.

Until this school saves its own bands, ShuleHub shows a default A–F set:

Letter	From %	To %	Points
A	80	100	5.00
B	70	79	4.00
C	60	69	3.00
D	50	59	2.00
F	0	49	0.00

1 Tab **Grading**. If the defaults are what you want, click **Save for this school** and confirm.

2 Or click **Add band**. Enter letter, points, from %, to %. Confirm. Bands sort high-to-low by from %.

3 Pen to change a band. Trash to remove one. Search filters by letter, range, or points.

Headmaster and Academic master can add, edit, delete, and save. School admin can see the list.

A percentage is matched to the first band where it falls between from % and to %. Leave no gaps if you do not want a leftover F from the built-in fallback.

What other menus use this

Students

Admit into a class and section of a year. Promote into the next year's class. A student can also have no class.

Exams and Grades

An exam belongs to a year (and usually a term and class). Papers pick subjects. Official term results combine exam components using Results weights, then letters from Grading.

Timetable

Needs allocations (who teaches what) and rooms. Buildings are only the dropdown behind rooms.

Teachers (directory)

People records. Department list is separate. Qualification list is set by platform admin on Configurations. Allocations on Academics point at these people.

Fees

Fee structures can be tied to a year and class. You cannot delete a year or class that still has fees.

Report cards

Show exam and term results. Letters and points come from this school's grading bands.

Typical day

Job	Clicks
Start a new school year	Academics → Years & terms → Add year → save. Check Term dates. Make current if needed.
Open Form 1 with two streams	Classes → Add class → Add section A → Add section B
Add Mathematics	Subjects → Add subject → MATH
Asha teaches Maths to Form 1 A	Teachers menu (add Asha if needed) → Academics → Teachers → Allocate teacher
Name Block A and Lab 1	Rooms → Add building → Add room → pick Block A
Set this school's A–F bands	Grading → Save for this school, or Add band / pen / trash
Change how term marks mix	Results → pick year (and optional term/subject) → four weights that pair to 100 → Save weights
Wrong term dates	Select the year → pen on the term → save
Teacher changes class	Teachers tab → pen on the allocation
Remove an unused year	Delete terms, classes, exams, fees, allocations, weights first, then trash the year

If something fails

What you see	What to do
Academic year already exists	Use another year name at this school.
End date must be after start date	Fix the dates on the year or term.

What you see	What to do
Delete year refused — terms / classes / students / exams / fees / allocations / weights / enrolment history / invoices / timetable	Remove or move those items first, in that spirit. Enrolment history blocks delete permanently for that year.
Term already exists	That name is already used in this year.
Delete term refused	Remove exams or result weights for that term first.
Class code already exists in this academic year	Use another code (F3 vs F3A) in the same year.
Delete class refused	Move students, delete sections, and remove exams or fees for that class.
Section already exists in this class	A and B cannot be added twice on the same class.
Delete section refused	Move or remove students in that section first.
Subject code already exists	Codes are unique for the whole school.
Delete subject refused	Remove the subject from exam papers, then grades.
Building name already exists	Pick another name.
Delete building refused	Delete or move its rooms first.
Classroom name or code already exists	Names and codes are unique at the school.
Remove this room from the timetable first	Clear timetable slots that use the room, then trash it.
This subject allocation already exists	That teacher already has that subject, class, section, and year.
No buildings / ask Headmaster or School admin	Academic master cannot create buildings. Someone with building rights must add one.
No allocations yet. Add teachers and subjects first	Create people on the Teachers menu, subjects here, then allocate.
Weights must add to 100	Midterm + semi exam = 100, and semi result + terminal = 100.
Grading save missing or refused	Only Headmaster and Academic master can write bands and weights.
Add buttons missing	You are not Headmaster, School admin, or Academic master — or that action is limited (buildings, grading).
Wrong school's classes	Open the correct school first. Academics never mixes schools.

Icons and confirms (whole page)

- Pen = edit. Trash = delete. Plus = add.
- Save, delete, make current, and save weights / bands ask for confirm.
- Search is on the current tab only. Clearing search shows the full list again.
- Empty states tell you the next step (add a year first, add a building first, and so on).

ShuleHub · Headmaster · Academics menu · Data is per school · Terms-per-year is per organization on Configurations · Grading bands are per school · Confirm dialogs appear before save and delete
